CHEMICAL

CATALYSTS CATALYTIC CONVERTERS AND COLLECTORS

JSC «Rosatom Chemical» unites enterprises producing exhaust gas purification and release systems and other automotive components, including instrumentation products.

FULL TECHNOLOGY CYCLE:

From catalyst development to serial production of exhaust gas neutraliser for cars AND TRUCKS with gasoline and diesel engines of various power, complying with international standards:

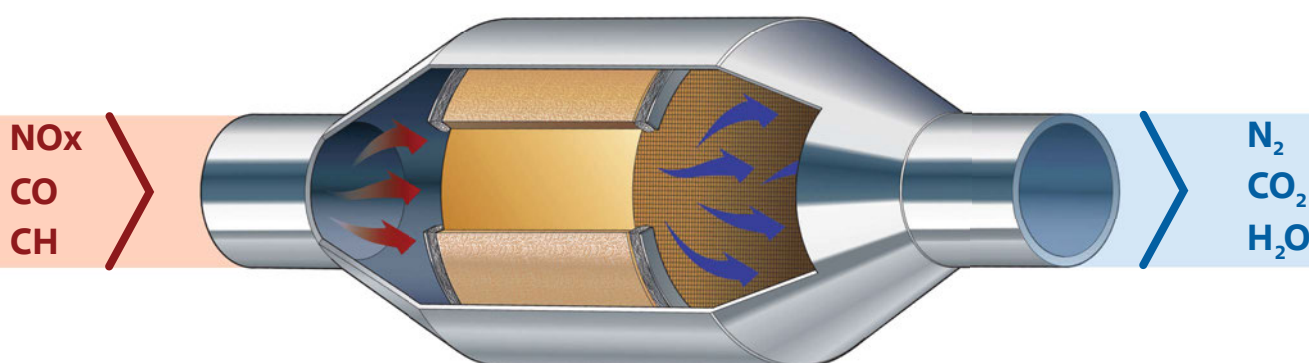

EURO-5

EURO-5+

EURO-6B

EURO-6C

EURO-6D

A wide range of products for various vehicles – from motorcycles to heavy-duty trucks and stationary installations.

Catalysts are individually designed for each vehicle and meet international quality standards.

CATALYSTS

Ceramic/metal carrier with active catalyst

Universal catalysts units used in catalytic converters and catalytic collectors, designed to clean exhaust gases of passenger cars and trucks with gasoline and diesel engines.

Catalysts on metal carrier

Catalytic converter insert block (catalytic converter cartridge).
Euro 3–5 on metal carrier.
Diameters: 90–120 mm.

Catalysts on ceramic carrier

Catalytic converter insert block (catalytic converter cartridge).
Euro 3–5 on ceramic carrier.
Diameters: 90–120 mm.

CATALYTIC CONVERTERS AND COLLECTORS

Catalytic converters and catalytic collectors for cars with gasoline and diesel engines of various power, complying with international standards **Euro-3, Euro-4, Euro-5, Euro-5+, Euro-6.**
