

INSTRUMENTATION PRODUCTS

Rosatom Chemical brings together enterprises producing exhaust gas neutralization and purification systems, as well as other automotive components, including instrumentation products.

Multifunctional current-collecting device

Coolant level sensor and temperature sensor

Steering column switches and start-stop button

Instrumentation products

Automotive Electrical Equipment

Automotive Mechatronics

Application areas

Special-purpose vehicles based on KAMAZ, URAL, GAZ

Special-purpose vehicles based on KAMAZ, URAL, GAZ

Air purification products

Catalytic converters

SCR exhaust gas aftertreatment system

Catalytic systems

Application areas

Exhaust gas purification systems for marine equipment

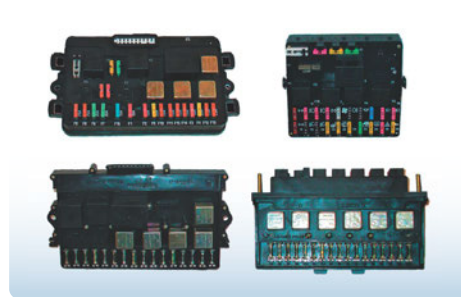

For railway transport and special purpose machinery

Aircraft air conditioning

Switching elements

Fuse blocks and relays

Relays and circuit breakers
